

We've Gone Mobile!

Written by William Bell

Sages.us has "gone mobile." Our new website will recognize when a mobile device - such as an iPhone, Android phone, iPad, or Android tablet - is used and will adjust its output accordingly making for a more pleasant browsing experience for the user. However, if preferred, our full desktop browsing experience may still be accessed, by following the "Desktop Version" link, at the bottom of our mobilized website. If you have a smartphone, tablet, or other mobile device, visit us at <http://www.sages.us/> , to try it out!

"It's a Great Day to be a Sage!"
